RESEARCH

Research areas

The research sectors to which I have dedicated myself have been enriched by a series of scientific publications and by my active participation as a speaker at various congresses. My main areas of interest include:

- Extensive studies on post-liver transplant tolerance, leading to the publication of papers significant scientific.
- Recent research focusing on immunosuppressive therapy in liver transplantation, with a focus particular to the new immunosuppressive drugs.
- Experience in the field of abdominal organ perfusion techniques during multi-organ harvesting, thus contributing to the continuous evolution of surgical practices.
- Study of the role of bile acids in liver transplantation, analyzing the impact of these critical factors on prospects for long-term success.
- Insight into the variables influencing hepatitis C recurrence after liver transplantation, focusing in particular on the important role of steatosis.
- Collaborations with Italian and European institutions to evaluate the predictive factors of tolerance in transplantation liver, contributing to the understanding of the dynamics of the transplantation process.
- Preparation of a specialization thesis in General Surgery focused on gallbladder cancer, deepening the clinical and therapeutic aspects of this pathology.

GRANTS

Uncovering Excellence 2014: Winner of research project as Principal Investigator on the theme: "Serum levels of stem cell factor (scf) and granulocyte colony-stimulating factor (g-csf) during hepatic regeneration after partial hepatectomy in humans".

Most recent Clinical Trials

Coordinator of the "Prospective randomized multicenter study to evaluate the clinical benefits of discontinuation of immunosuppressive therapy in liver transplant patients identified as "operationally tolerant" based on non-invasive tolerance tests. Code: FARM858FRN – Subsidy from AIFA –Transplant Centers involved: Rome, Modena, Padua, Bari. Duration: 36 months

Coordinator of the multicenter study "Discontinuation of immunosuppressive therapy in patients with liver or kidney transplant after search for predictive factors of immunological tolerance." Grant from the Region Basilicata – Transplant Centers involved: Rome, L'Aquila, Naples, Cagliari. Duration: 24 months
